M. SC. ENGINEER ARCHITECT

My name is Martyna Stawska and for 5 years already I am developing my greatest passion - the architecture. In 2015 I graduated from Poznan University of Technology with an Architectural Engineering Degree. Then I have been studying a master's degree at the same university. In July 2016 I defended my Master's Thesis.

I am very creative and constantly developing my skills and abilities - not only during classes at the university, but also by participating in various courses and events.
